

JAYDEN RESOURCES INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND
RESULTS OF OPERATIONS
FOR THE SIX MONTHS ENDED June 30, 2013

The following Management's Discussion and Analysis ("MD&A") is intended to assist the reader to assess material changes in financial condition and results of operations of Jayden Resources Inc. ("Jayden" or the "Company") as at June 30, 2013 and for the six months then ended in comparison to the same period in 2012.

This MD&A should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2012 and supporting notes. These financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

All monetary amounts are in Canadian dollars unless otherwise specified. The effective date of this MD&A is August 13, 2013. Additional information relating to the Company is available on SEDAR at www.sedar.com.

Contents of the MD&A

1. Overview
2. Highlights for the quarter ended June 30, 2013
3. Results of operations for the six months ended June 30, 2013
 - 3.1 Exploration projects
 - 3.1.1 Silver Coin Property
4. Liquidity and Capital Resources
 - 4.1.1 Share capital
 - 4.1.2 Contractual commitments
5. Related party transactions
6. Adoption of accounting standards and pronouncements under IFRS
7. Financial instruments
8. Internal control over financial reporting
9. Critical accounting estimates and judgements
10. Cautionary statement on forward-looking information

1. Overview

Jayden is in the advanced stage of exploration on its 80% owned Silver Coin Property. The Silver Coin Property is located approximately 25 kilometres by road north of Stewart, British Columbia in the Skeena Mining Division of British Columbia and consists of 44 claims totalling 1496 net Ha.

Since 2004, the Company, along with its joint venture partner Mountain Boy Minerals Ltd. ("Mountain Boy"), has conducted extensive exploration as well as environmental, metallurgical and resource studies on its Silver Coin Property. In April 2007, Minefill Services calculated a NI 43-101 compliant resource on the Silver Coin Property. Subsequently, the Company conducted aggressive drill campaigns in 2007 and 2008. In December of 2009 Tetra Tech Inc. completed a NI 43-101 compliant Preliminary Economic Assessment, incorporating the new drill holes and issued an update to this report on March 12, 2010.

The Company completed a drill program in September of 2010 with the objectives of confirming historical drill results, filling in undrilled portions of the mineralization, extending the mineralization to the north of the existing resource and obtaining fresh core for continued metallurgical testing. Based on this new drilling, the Company contracted Minarco MineConsult to complete an updated NI 43-101 compliant Technical Report and Preliminary Economic Analysis with an updated resource which was issued April 13, 2011.

Jayden began a significant drill program in May 2011 with the principal objective of reducing hole spacing in the main resource area. This program was completed in September of 2011 with a total of 109 core holes drilling 17,468m. In addition to Jayden's normal core logging/QAQC and assay procedures the Company determined specific gravity for representative samples of much of the 2011 core to bolster the Company's engineering data.

Jayden has conducted the majority of its exploration on its properties using third party geological consultants and subcontractors.

The Company is taking additional steps to advance the Silver Coin Property toward production including contracting AMEC Earth and Environmental to continue environmental baseline studies begun in 2009 by Cambria Gordon Ltd. This baseline environmental work will support future permitting efforts.

Metallurgical test results, including comminution testing, show that the Silver Coin mineralization can be effectively treated using standard milling practices. During 2011 the Company conducted an aggressive metallurgical test program. The test work confirmed the Company's previous favourable recovery estimates and confirmed that a gravity circuit may be useful in recovering free gold and electrum, that a bulk sulphide concentrate will recover very high percentages of the gold and silver and that concentrate can be treated effectively by cyanide to recover an overall 87% of the gold and roughly 50% of the silver in a dore.

2. Highlights for the six months ended June 30, 2013

- Jayden entered into an asset purchase agreement with Decade Resources Ltd. ("Decade") to acquire Decade's Grassy 1 and Grassy 2 mineral claims which adjoin the eastern edge of the Silver Coin Property. Under the terms of the agreement the Company must pay \$60,000 to Decade by December 31, 2012. On December 12, 2012 the agreement's term was extended to June 30, 2013. After the six months ended June 30, 2013, the Company did not renew the agreement with Decade.

3. Results of operations for the six months ended June 30, 2013

The following table sets forth selected consolidated information for the six months ended June 30, 2013, 2012 and 2011.

For the six months ended June 30,	2013	2012	2011
Financial results:			
Net loss for the period	\$ (771,888)	\$ (993,880)	\$ (1,117,222)
Basic and diluted loss per share	(0.0031)	(0.0040)	(0.0001)
Balance sheet data:			
Cash and cash equivalents	156,512	556,907	1,473,354
Mineral properties	15,580,139	15,688,798	12,329,722
Net current assets	551,762	893,763	990,007
Shareholders' equity	15,079,560	16,753,147	13,490,935
Cash flow data:			
Exploration expenditures	(312,850)	(507,123)	(1,236,095)
Common share proceeds (gross)	-	-	3,622,999

Because the Company is an exploration company, it has no revenue from mining operations.

The table below sets forth selected results of operations for the Company's eight most recently completed quarters.

	Jun 30, 2013	Mar 31, 2013	Dec 31, 2012	Sep 30, 2012	Jun 30, 2012	Mar 31, 2012	Dec 31, 2011	Sep 30, 2011
Net loss	(552,132)	(219,756)	(503,317)	(379,607)	(237,879)	(756,001)	(362,710)	(171,801)
Basic and diluted loss per share	(0.00)	(0.00)	(0.00)	(0.00)	(0.00)	(0.03)	(0.00)	(0.00)
Write-down of interests in mineral properties	-	-	-	-	-	-	-	-
Share-based payments	-	-	-	-	-	487,100	46,600	-
Total assets	16,396,734	16,898,353	16,807,255	17,102,571	16,846,320	17,224,905	17,473,443	18,032,549
Working capital	551,762	1,063,244	741,929	377,431	893,763	1,299,811	1,849,833	2,858,516

Quarter ended June 30, 2013 compared to quarter ended June 30, 2012

For the three-month period ended June 30, 2013, the Company recorded a net loss of \$552,132 compared to \$237,879 in the comparable period in the prior year. The increase in net loss from the period in the prior year is due to an increase in general administrative expenses.

The Company started 2013 with a working capital of \$741,929 and by the end of the six month period ended June 30, 2013 the Company's working capital was \$551,762. This decrease in working capital is due to general administrative expenses.

3.1 Exploration projects

3.1.1 Silver Coin Property:

GEOLOGY

The Silver Coin Property covers an area of intensely altered Lower-Jurassic Age intermediate volcanic rocks. Detailed regional and property scale geologic mapping conducted by government and Company-contracted geologists indicates that the area was a regional paleotopographic high with a stratovolcano centered on the nearby Mount Dilworth. The rocks are cut by a variety of intrusive rocks of both early Jurassic and Eocene Age. During the 2011 field season, the Company conducted detailed geologic mapping of the lithology, alteration and structure of the main resource area. This work confirmed several of the working theories related to controls on the mineralization but also added important new insights on the alteration and structure that may control mineralization.

HISTORY

In 1991, Silver Coin was operated as an underground mine and produced 102,539 tonnes at an average grade of 8.9 g/t Au and 55.50 g/t Ag from the high-grade Facecut Zone, located on the Big Missouri claim. This ore was processed at the nearby Silbak Premier Mill.

Prior to the Company's participation in the Silver Coin Property, a total of 422 holes were drilled with an aggregate depth of approximately 37,401 meters. This historic drilling included 293 underground drill holes with an aggregate depth of approximately 17,500 meters during the period from 1988 to 1994.

In 2004, the Company entered into a joint venture agreement with Mountain Boy Minerals Ltd and since June 2006, the Company has been the operator of the Silver Coin Property, with Mountain Boy serving in advisory and contractor capacities. Mountain Boy was granted a first right to negotiate contracts to provide services in connection with exploration and development work on the Silver Coin Property and this has proven very beneficial to the Company because of their extensive local knowledge and operational capability.

In 2010, the Company contracted AMEC Earth and Environmental to continue with environmental baseline studies started in 2009 by Cambria Gordon Ltd. AMEC has since expanded the water sampling and hydrology program and importantly, confirmed Cambria Gordon's conclusion that No Name Lake is non-fish-bearing. To RIC standards, No Name Lake, a potential site for tailings placement, is devoid of fish and thus remains a potentially viable option for design and operation of the project. AMEC is focusing on surface hydrology studies to characterize flow rates and surface water quality in several critical streams on the property. AMEC has also installed a continuously monitoring weather station on the property to establish baseline air quality and climate data for the project.

Also in 2010, the Company drilled 18 holes totaling 2807 meters with the objective of confirming historical drilling, better understanding the geology and expanding the resource. Based on these

new drill results the Company completed a 43-101 compliant Technical Report and Preliminary Economic Analysis dated April 13, 2011. This updated resource estimate represents an overall increase in the average gold grade of 10.9 per cent and an 11.1-per-cent increase in the number of resource ounces previously reported, from 191,300 measured ounces, 644,300 indicated ounces and 655,200 inferred ounces, to 218,410 measured ounces, 624,006 indicated ounces and 813,273 inferred ounces. The updated resource estimate incorporates a total of 732 drill holes (88,645 metres) plus 76 trenches (1,447 metres).

Silver Coin hosts a gold-silver-zinc resource containing a 43-101 resource of 24.13 million tonnes grading 1.08 g/t gold for a total of 842,416 ounces of gold, 4.45 million ounces of silver and 91.17 million pounds of zinc in the measured and indicated categories at a 0.3 gram gold per tonne cut-off grade. The estimated inferred resources comprise an additional 813,273 ounces of gold, 6.69 million ounces of silver and 128 million pounds of zinc. Minarco MineConsult of Beijing, China estimated the resource in a technical report dated April 13, 2011 as follows:

0.3 gt Au Cut-off	Tonnes	Au (g/t)	Ag (g/t)	Zn (%)	Au (oz)	Ag (oz)	Zn (lbs)
Measured	4,372,225	1.55	6.53	0.26	218,410	918,417	25,531,741
Indicated	19,759,025	0.98	5.57	0.15	624,006	3,537,769	65,642,277
M&I	24,131,250	1.08	5.74	0.17	842,416	4,456,186	91,174,018
Inferred	32,443,840	0.78	6.41	0.18	813,273	6,691,185	128,006,920

2011 WORK

In May of 2011, the Company began a drilling program with objectives that included upgrading the inferred resource ounces to the indicated or measured classification, collecting fresh core for metallurgical testing and enhancing the understanding of the geology of the deposit. That drill program was completed in September of 2011 and included 109 holes totalling 17,468m.

During 2011 the Company also advanced metallurgical test work and site-based environmental baseline studies as well as initiated work on detailed site engineering studies.

2011 DRILLING

During the summer of 2011, the Company drilled 109 holes totalling 17,468m. The drill program was successful in drilling significant widths of good grade gold and silver mineralization. Highlights from the program include:

DHID	From	To	Interval	Gold Weighted Average (g/T)	Silver Weighted Average (g/T)	Gold Weighted Average (oz.t)	Silver Weighted Average (oz.t)
SC11-328	41.2	57.68	16.48	1.553	6.625	0.045	0.193

In 2011, the Company also advanced metallurgical studies that incorporate lower sample head grades that are closer to the expected ore grades for the current modeled open pit. The recently completed laboratory testing used a blended master composite sample (1.2 g/t Au, 4 g/t Ag) and other variability samples (grading from 0.5 g/t to 2.5 g/t Au) obtained from drill core intervals. These samples were used to simulate the response that would be expected in processing such ore by gravity and flotation, with the option of cyanide leaching of the flotation concentrate.

These metallurgical results indicate that the lower grade feeds responded very well to standard flotation procedures. Further, the test data indicates that gravity pre-treatment is effective in recovering coarse gold and electrum which in turn improves the gold and silver leach response. The combined gravity and flotation recovery is expected to be approximately 96% for gold and 87% for silver. Leach recovery of the sulphide concentrate varied, with gold dissolution ranging from 85% to 95%, with lower grade concentrates trending toward the lower recoveries. Silver leach dissolution rates ranged from 40% to 60%. A typical flotation concentrate might be expected to grade 29 g/t Au and 93 g/t Ag, contained in less than 5% of the original feed weight, thereby greatly reducing the size of a leach circuit. Optionally, with additional flotation cleaning the final concentrate can be upgraded further to as little as 2% of the original feed weight. This indicates excellent upgrading potential which may allow the Company the option to sell or treat the concentrate offsite. In summary, the preliminary metallurgical testing shows excellent flotation response that allows for a variety of process options to be considered in advancing the project.

Environmental baseline studies continued on the site in 2011, including monitoring the Company's continuously recording meteorological station and certain improvements have been made to expand the data we collect from our network of stream sites.

Long Lake Hydro is a private company developing a significant hydroelectric power project that will produce power year round from turbines less than four kilometers from our proposed plant site. New public BC hydro lines will connect to the turbines and the Company will have access to dependable public-utility power within a few kilometers of the property with minimal capital expenditure.

In late 2011, the Company initiated infrastructure studies to advance understanding of important development aspects of Silver Coin. The Company contracted Allnorth Consultants Ltd. to design infrastructure such as road access, building design and location, routing between the proposed open pit mine and the mill and waste facilities, design of electric transmission lines to bring power to the project from the Long Lake Hydro turbines and associated costs for all this construction and infrastructure development.

During 2011 the Company also made several important advances in its ownership of the project. These include the acquisition of the 4 large INDI claims from Nanika Resources and the addition of a number of cell claims staked by the Company both within and peripheral to the core claim block. Also during 2011, the Company completed its required expenditure of \$4 million on the project to earn an additional 10% to bring its total ownership in Silver Coin to 80%. To allow greater flexibility in future operational planning, the Company entered into an option to purchase the two Grassy claims from Decade Resources. These claims are east of and contiguous to the main Silver Coin block and can provide additional space for future operations at the site.

The Company also expanded the scope of work from AMEC to include detailed design of waste rock facilities and tailings impoundments based on recent work by Minarco to develop a mine and mill plan for the project.

2012 WORK

During 2012, the Company has focused on advancing technical and engineering studies through its main contractors, AMEC Earth and Environmental, All North Consultants Ltd. and Minarco Mineconsult in support of developing a plan for building the projects and demonstrating its economic viability.

During 2012, the Company did not do any field work.

In summary, the Silver Coin Property hosts a substantial gold and silver resource, it is amenable to low cost open pit mining, the metallurgy of the mineralization is excellent offering high recoveries and flexible options for concentrate treatment, reliable electric power is available just a few kilometers from the site, it is road accessible and the Granduc Road links Silver Coin with the deep water seaport at Stewart, B.C.

4. Liquidity and capital resources

The following table summarizes the Company's cash on hand, working capital and cash flow

As at June 30,	<u>2013</u>	<u>2012</u>
Cash and equivalents	\$ 156,512	\$ 556,907
Working capital	551,762	893,763
Period ended June 30,	<u>2013</u>	<u>2012</u>
Net cash used in operating activities	(666,661)	(474,043)
Net cash used in investing activities	399,266	(506,390)
Net cash provided by financing activities	196,833	-
Net change in cash	<u>\$ (70,562)</u>	<u>\$ (980,433)</u>

The Company is dependent on the sale of treasury shares to finance its exploration activities, property acquisition payments and general and administrative costs. The Company will require additional funds in 2013 to continue its exploration program.

During the year ended 2012, the Company entered into loan agreements with the CEO and director of the Company whereby \$1,015,872 was loaned to the Company with no interest or term of agreement. During the six months ended June 30, 2013, the Company entered into another loan agreement with the CEO and director of the Company with the same terms for the amount \$196,833.

To maintain the Silver Coin Property in good standing, no work or payments are required on the majority of the claims until October 2017, with the exception of the Kansas claim which is a Crown Grant and therefore subject to an annual tax payment of \$24. Several recently acquired cell claims, which overlie some of the older Silver Coin legacy claims, have annual payments due in October 2012 and September 2013.

Jayden's completed its 2011 plans of reducing drill-hole spacing, preliminary metallurgical test-work, initiating mine planning and baseline environmental studies, continued surface geologic mapping, and securing adequate supplies of water and power. These items are required for the project to proceed toward feasibility.

The Company will need to continue to raise more funds in order to proceed with its exploration plans.

4.1.1. Share capital

On 8 August 2012, the Company changed its place of jurisdiction and was registered as an exempted company with limited liability by way of continuation in the Cayman Islands. Concurrent with the continuation in the Cayman Islands and in accordance with the Articles, the authorized share capital of the Company was concurrently changed to 5,000,000,000 shares without par value, with an aggregate consideration for which such shares may be issued of C\$10,000,000,000.

Prior to that the Company had an authorized share capital of an unlimited number of common shares of which 251,396,301 shares were issued and outstanding at June 30, 2013.

In October 2011, the Company issued 67,894,033 shares resulting from 45,000,000 share purchase warrants exercisable at a price of \$0.15 per share and 22,894,033 share purchase warrants exercisable at a price of \$0.05 per share being exercised for gross proceeds of \$7,894,701.

The Company has no full share equivalent warrants outstanding as of June 30, 2013 and December 31, 2012.

The Company has no shares remaining in escrow at June 30, 2013.

The Company has a stock option plan whereby the maximum number of shares subject to the plan, in the aggregate, shall not exceed 10% of the Company's issued and outstanding shares. The maximum term of any option will be ten years and the vesting is at the direction of the board, however, options granted to consultants performing "investor relations' activities" must at a minimum vest in stages over a period of not less than twelve months, with no more than ¼ of the options vesting in any three month period or such longer period as the board determines. The exercise price shall be no less than the discount market price as determined in accordance with TSE policies.

During the period ended June 30, 2013 the Company did not grant any stock options. During the period ended June 30, 2013, 20,000 options expired unexercised.

In January 2012, the Company granted 5,250,000 stock options to directors, officers and consultants at an exercise price of \$0.15 per share for a period of five years.

During the year ended December 31, 2012 the Company recognized \$487,100 (2011 - \$46,600) of share-based compensation expense. The Company used the Black-Scholes option pricing model to estimate the fair value of the options at the grant date using the following weighted average assumptions:

	<u>2012</u>
Risk-free interest rate	1.26%
Dividend yield	Nil
Expected volatility	112%
Expected option life	5.0 years

Option pricing models require the input of highly subjective assumptions regarding the expected volatility. Changes in assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a realistic measure of fair value of the Company's stock options and warrants at the date of the grant or thereafter.

4.1.2. Contractual commitments

The Company entered into consulting contracts providing the following services:

	<u>Monthly Fee</u>	<u>Service Provided</u>
	\$	
Baron Global Financial Canada Ltd.	10,000	Corporate advisor
James Andrew & Company	6,000	Consultant
Lawrence A. Dick Consulting Ltd.	3,000	Consultant
Robert Perry Consulting LLP	US\$13,000	Geological services
Carta Exploration Ltd.	6,000	Geological services
TransMax Investing	10,000	Management
Letty Wan	HK\$60,000	Management and director's fees

During the quarter end, the Company terminated all contracts with the exception of James Andrew & Company and Baron Global Financial Canada Ltd.

5. Related party transactions

(a) Related party receivables

At June 30, 2013 the Company was owed \$104,061 (December 31, 2012 - \$257,279) by Baron Capital Limited, a company who has a director who is a close family member to Letty Wan, the CEO and a director of the Company.

(b) Related party expenses

The Group incurred the following material related party transactions during the respective years:

Services provided for the six months ended June 30, 2013	Management services	Consulting	Rent and	Share-	Share
		and advisory services	office expenses	based payments	issue costs
	\$	\$	\$	\$	\$
Baron Global Financial Canada Ltd. (1)	39,000	-	21,000	-	-

Services provided for the year ended December 31, 2012	Management services	and	Rent and	Share-	Share
		advisory services	office expenses	based payments	issue costs
	\$	\$	\$	\$	\$
Baron Global Financial Canada Ltd. (1)	78,000	-	42,000	-	-

- (1) Mr. Herrick Lau Mong Tak and Mr. David Arthur Eaton, CFO and director of the Company, were the managing director and chairman of Baron Global Financial Canada Ltd, respectively.

According to the commercial agreements between the Company and the related companies, the transactions with Baron Global Financial Canada Ltd. and Baron Asia Limited. will continue after the reporting date until the expiry of the commercial agreements. The commercial agreements for other related party transactions had been terminated during the years. The directors of the Company are of the opinion that the related party transactions were conducted on normal commercial terms and in the ordinary and usual course of the Group's business.

(c) Compensation of key management personnel

Key management personnel are the directors of the Company whose compensation included in staff costs comprised the following:

	Six Months Ended June 30,	
	2013	2012
	\$	\$
Employees' remuneration summary		
Salaries and other benefits	164,174	139,190
Director's fees	-	46,271
Share-based payments	-	357,280
	164,174	542,741

6. Adoption of accounting standards and pronouncements under IFRS

Certain pronouncements were issued by the IASB or the IFRS Interpretations Committee that are mandatory for accounting periods beginning before or on January 1, 2013. The following new standards, amendments and interpretations, that have been adopted in these interim financial statements, have had an effect on the Company's future results and financial position:

- IFRS 13 Fair Value Measurement

IFRS 13 aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The requirements, which are largely aligned between IFRSs and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRSs.

The adoption of IFRS 13 by the Company has had no material impact. The fair value of the available-for-sale investment has been determined directly by reference to published price quotations in an active market. Prior to adoption of IFRS 13 the Company measured the available for sale investment on the same basis.

- Amendment to IAS 1 Presentation of Financial Statements

The amendments to IAS 1 revised the presentation of other comprehensive income (OCI). Separate subtotals are required for items which may subsequently be recycled through profit or loss and items that will not be recycled through profit or loss. The Company has updated the presentation of OCI on the face of the Statement of Comprehensive Income.

In addition, the following new or amended standards and interpretations that are mandatory for 2013 annual periods have not had a material impact on the Company:

- IFRS 7 Financial Instruments: Disclosures: Amendments – Offsetting Financial Assets and Financial Liabilities
- IFRS 10 Consolidated Financial Statements
- IFRS 11 Joint Arrangements
- IFRS 12 Disclosures of Interests in Other Entities
- IAS 19 Employee Benefits (Amendments)
- IFRIC 20 Stripping Costs in the Production Phases of a

7. Financial instruments

The Group is exposed to financial risks through its use of financial instruments in its ordinary course of operations. The financial risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. The Group does not have any written risk management policies and guidelines. However, the board of directors meets regularly and co-operates closely with key management to identify and evaluate risks and to formulate strategies to manage financial risks. The Group has not used any derivatives or other instruments for hedging purposes and does not hold or issue derivative financial instruments for trading purposes. The most significant risks to which the Group is exposed to are described below.

(i) Currency risk

Some of the operating expenses and cash held are denominated in foreign currencies and as such are subject to currency risk. The Group does not enter into derivative financial instruments to mitigate this risk but the Group does not believe its net exposure to foreign exchange risk is significant.

The following table details the Group's sensitivity to a 10% increase or decrease in the Canadian dollar against the foreign currency denominated monetary items above. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the end of the year for a 10% change in foreign currency rates. A positive number indicates a decrease in loss for the year where the foreign currencies strengthen against the Canadian dollar. The opposite number will result if the foreign currencies depreciated against the Canadian dollar.

	Six months ended		Year ended	
	June 30,		December 31,	
	2013		2012	
	USD	Other	USD	Other
	\$	\$	\$	\$
Effect on loss after tax for the year and retained profits				
- The Group	611	464	(178)	(28,158)

(ii) Credit risk

The Group's cash is held in authorized Canadian financial institutions. The Group does not have any asset-backed commercial paper. Management believes that the credit risk concentration with respect to its financial instruments is minimal.

The Group adopts conservative investment strategies. Usually investments are in liquid securities quoted on recognized stock exchanges. No margin trading is allowed. Loans and financial guarantees to individuals on non-Group entities have to be approved by the board of directors. The board monitors the Group's overall investment position and exposure on a day to day basis.

The credit and investment policies have been followed by the Group since prior years and are considered to have been effective in limiting the Group's exposure to credit risk to a desirable level.

(iii) Interest rate risk

Interest rate risk is the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group has interest-bearing assets in relation to cash at banks and GICs carried at floating interest rates with reference to the market and non-interest bearing director's loans. The Group's operating cash flows are substantially independent of changes in market interest rates. The Group has not used any financial instrument to hedge potential fluctuations in interest rates. The exposure to interest rates for the Group is considered minimal. The Group has no interest bearing borrowings.

The policies to manage interest rate risk have been followed by the Group since prior years and are considered to be effective.

JAYDEN RESOURCES INC.
Management's Discussion and Analysis
For the Six Months Ended June 30, 2013

(iv) Liquidity risk

The Group's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Group manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the board of directors are actively involved in the review, planning and approval of significant expenditures and commitments.

The liquidity policies have been followed by the Group since prior years and are considered to have been effective in managing liquidity risk.

The following tables detail the remaining contractual maturities at the respective reporting dates of the Group's and Company's non-derivative financial liabilities, which are based on contractual undiscounted cash flows and the earliest date the Group and the Company can be required to pay:

The Group	Carrying amount	Total contractual undiscounted cash flow	Within one year or on demand	One to two years
	\$	\$	\$	\$
At June 30, 2013				
Payables and accruals	104,317	104,317	221,324	-
Amounts due to related companies	152	152	17,450	-
Loans from a director	1,212,705	1,212,705	196,833	1,015,872
	1,317,174	1,317,174	435,607	1,015,872
At December 31, 2012				
Payables and accruals	196,244	196,244	196,244	-
Amounts due to related companies	14,178	14,178	14,178	-
Loans from a director	1,015,872	1,015,872	-	1,015,872
	1,226,294	1,226,294	210,422	1,015,872

(v) Other price risk

Other price risk relates to the risk that the fair values or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than changes in interest rates and foreign exchange rates). The Group is exposed to change in market prices of listed equity in respect of its investments classified as available-for-sale investments (Note 11).

The policies to manage other price risk have been followed by the Group since prior years and are considered to be effective.

(vi) Fair value measurements recognized in the consolidated statements of financial position

The following table presents financial assets and liabilities measured at fair value in the statement of financial position in accordance with the fair value hierarchy. The hierarchy groups financial assets into three levels based on the relative reliability of significant inputs used in measuring the fair value of these financial assets. The fair value hierarchy has the following three levels:

Level 1 – quoted prices (unadjusted) in active markets for identical assets;

Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – inputs for the asset that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the financial asset is categorized in its entirety is based on the lowest level of input that is significant to the fair value measurement.

The financial assets measured at fair value in the consolidated statements of financial position are grouped into the fair value hierarchy as follows:

	At June 30, 2013			Total
	Level 1	Level 2	Level 3	
	\$	\$	\$	\$
Assets:				
Available-for-sale investments				
- listed equity securities, at fair value	16,019	-	-	16,019
	16,019	-	-	16,019
	At December 31, 2012			Total
	Level 1	Level 2	Level 3	
	\$	\$	\$	\$
Assets:				
Available-for-sale investments				
- listed equity securities, at fair value	28,034	-	-	28,034
	28,034	-	-	28,034

There have been no significant transfers between levels 1 and 2 in the respective reporting periods. The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared to the previous reporting periods. The listed equity securities are denominated in Canadian dollars. Fair values have been determined by reference to their quoted bid prices at the reporting dates.

(vii) Categories of financial assets and liabilities

The carrying amounts of the Group's and the Company's financial assets and liabilities as presented in the statements of financial position are as follows:

	At June 30, 2013	At December 31, 2012
	\$	\$
Financial assets		
Available-for-sale investments	16,019	28,034
Loans and receivables		
- Amount due from a related company	104,061	257,279
- Cash and cash equivalents	156,512	227,074
	<u>276,592</u>	<u>512,387</u>
Financial liabilities		
At amortized costs		
- Payables and accruals	(104,317)	(171,021)
- Amount due to related companies	(152)	(14,178)
- Loans from a director	(1,212,705)	(1,015,872)
	<u>(1,317,174)</u>	<u>(1,201,071)</u>

8. Internal control over financial reporting

The Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO") of the Company, together with the Company's management, are responsible for the information disclosed in this MD&A and in the Company's other external disclosure documents. For the six months ended June 30, 2013, the CEO and the CFO have designed, or caused to be designed under their supervision, the Company's disclosure controls and procedures ("DCP") to provide reasonable assurance that material information relating to the Company and its consolidated subsidiaries has been disclosed in accordance with regulatory requirements and good business practices and that the Company's DCP will enable the Company to meet its ongoing disclosure requirements.

The CEO and CFO have evaluated the effectiveness of the Company's DCP and have concluded that the design and operation of the Company's DCP were effective as of June 30, 2013 and that the Company has the appropriate DCP to ensure that information used internally by management and disclosed externally is, in all material respects, complete and reliable.

The CEO and the CFO are also responsible for the design of the internal controls over financial reporting ("ICFR") within the Company in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial Reporting Standards ("IFRS"). During the year ended December 31, 2012, the Company engaged an international business advisory firm to assess the effectiveness of the Company's ICFR.

During the design and evaluation of the Company's ICFR, management identified certain non-material deficiencies, a number of which have been addressed or are in the process of being addressed in order to enhance the Company's processes and controls. The Company employs entity level and compensating controls to mitigate any deficiencies that may exist in its process controls. Management intends to continue to further enhance the Company's ICFR.

The Company's management, including its CEO and CFO, believe that any DCP and ICFR, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override to the future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

There have been no changes in the Company's ICFR during the six months ended June 30, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's ICFR.

9. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates and assumptions

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Depreciation

The Company's management exercises its judgement in estimating the useful lives of the depreciable assets. The estimated useful lives reflect the management's estimate of the periods the Company intends to derive future economic benefits from the use of these assets. The Company depreciates its property, plant and equipment in accordance with the accounting policies. The carrying amount of the property, plant and equipment is disclosed in note 9 of its condensed consolidated interim financial statements.

Asset retirement obligations

The Company recognizes the liability for an asset retirement obligation. The relevant costs in associated with the assets retirement obligations are estimated based on the Company's interpretation of current regulatory requirements. Based on the assessment, the Company did not have any significant asset retirement obligations at the reporting dates.

Critical judgements in applying the Company's accounting policies

The following is the critical judgement, apart from those involving estimations that management have made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognized in the financial statements.

Exploration and evaluation assets

When there are events or changes in the circumstances which indicate the carrying amount of the exploration and evaluation assets may not be recoverable, the Company will take into consideration of the recoverable amounts of the relevant cash generating unit ("CGU"). After taking into account the current economic environment, the management reviews the developing projects and exploration plans and confirms that there is no indicator for impairment on the exploration and evaluation assets of the Group at the reporting dates.

Impairment of available-for-sale investments

For available-for-sale investments, a significant or prolonged decline in fair value below its cost is considered to be objective evidence of impairment. Judgement is required when determining whether a decline in fair value has been significant and/or prolonged. In making this judgement, the historical data on market volatility as well as the price of the specific investment are taken into account.

10. Cautionary statement on forward-looking information

This MD&A, which contains certain forward-looking statements, are intended to provide readers with a reasonable basis for assessing the financial performance of the Company. All statements, other than statements of historical fact, are forward-looking statements. The words "believe", "expect", "anticipate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule" and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company, are inherently subject to significant business, economic and competitive uncertainties and contingencies.

Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements. Such factors include, but are not limited to, fluctuations in the currency markets such as Canadian dollar, and U.S. dollar, fluctuations in the prices of commodities, changes in government legislation, taxation, controls, regulations and political or economic developments in Canada, the United States, or other countries in which the Company carries or may carry on business in the future, risks associated with mining or development activities, the speculative nature of exploration and development, including the risk of obtaining necessary licenses and permits, and quantities or grades of reserves. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company.

Readers are cautioned that forward-looking statements are not guarantees of future performance. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those acknowledged in such statements. Specific reference is made to the Company's most recent Annual Information Form on file with Canadian provincial securities regulatory authorities for a discussion of some of the factors underlying forward-looking statements. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except to the extent required by applicable laws.
